The officer was walking along on Short street about that hour and noticed two men coming across the river in a skiff. He secluded himself and when they landed he groped his way through the darkness to them and found the two named above.

They had two mighty fine shoats in the boat with them and when Officer Purnell demanded an explanation they could not give a plausable one and the officer arrested them.

They refused to go without a warrant and Judge Wadsworth was awakened at 20 clock to issue warrants for the arrest of the two.

Officer Purnell returned afterwards and got Weaver first.

It is not known who the shoats belonged to, but it was some one living near the river bank in Aberdeen.

iwenty-four out of every twenty-five know every game that can be named. Take the same crowd and march them lato the gap ballroom, and it is a safe assertion that the floor manager will not need call 'One more couple' more than once until these 'old and middle aged spiders' are out to the floor keeping step to the music of a violin, banjo and guitar. They were taught daneling and card playing when young at the fireside. They followed it up in youth and were not given the opportunity of attending church, or if they were the importance of attending it was not impressed upon their mind. If they were compelled when children to go to prayer-meeting on Thurrday night instead of attending the daneling school, if they would attend the services of the church or the holy Sabbah instead of remaining at home and playing social games of cards, they would not now sit about and 'loaf and lounge,' but would appreciate the necessity of the salvation of the soul, and would pay unore attention to the commandments of God, and not to the caterings of society. Take these self-same "spiders" and you will find upon ouestloling that those who option inws, beat the prosecution in every one of the cases.

The cases have been watched with interest in local ordion communities generally, as it concerned the right of dealers to send intoxicants by express C. O. D.

The Superior Court recently decided, it in a case somewhat similar to this one, that the sale was made in the town where in the consignor was located, and did not therefore come within the limits of the Prohibition laws of the town where the goods were received.

Judge Saudey, while intimating his disapproval of this decision, dismissed the case in accordance with the optulon. But the question remains still massettled, as the Commonwealth's Attorney will carry it to the Supreme Court, and feels confident that another presentation of the question will result differently.

Take those self-sume "spiders" and you will find upon questioning that those who associate together now associated together in their younger days, and arm in arm at-tended these dances.

"THERE are fewer blind persons in the United States than any other country," says a Democratic exchange. Yes; but it wasn't so in November, 1892. They have got their eyes open now.

THE Secretary of Agriculture in his annual report, just submitted to Congress, points out that a very large share of our imports of foreign goods consists of agricultural products, which he thinks should be grown in this country. Among others he mentions wool, tobacco and sugar, all of which are directly and deliberately attacked by the new Tariff measure before Congress. If Secretary MORTON be sincere in his desire to build up agriculture, there is evidently some difference of opinion in the Cabinet, be-cause the President has expressed his apal of "my" measure submitted in the hape of the new Free-trade Bill.

BULLETINED npon the walls of a Co abus avenue church in Boston is a call for 100,000 signatures to a petition asking Congress to defeat the Tariff Bill in order to save the prosperity of the country and re-open to labor the field for employment. New York Press.—The Democrational majority of the Ways and Means Committee has decided to tax thrift and punish ndustry. The determination of the mitte has decided to tax thrift and punish industry. The determination of the majority to impose a tax upon Individual nerows is reported in The Press Washington dispatches this morning The necome tax is one, of all tuxes, notoriusly the most unjust, unpopular and nquisilorial. It is a war tax, pure and simple. It can be defended only on the ground of absolute, inexorable necessity.

ground of absolute, inexorable necessity.

A Nation struggling for its life against armed enemies may justifiably place a tax on the lacomes of lis elitzens to raise funds for the supreme duty of self preser vation. For a great and rich Nation founded on the principles of equality and justice, at peace with all the world, possessing already an equitable and efficient aystem of taxation, to resort to this odd ous and discreditable device would be erimined folly. Yet this is precisely what the Bourbous who dominate the Democratic party propose to do.

An income tax is class legislation of the worst yort. It assails the fundamental doctrines of Americanism. Hiputs a premium on perjury. It necessitates the employment of a vast army of spice and informers, commissioned tory fun to every man's business and intrude in matters with which the Government has no right, under ordinary conditions, to interfere.
